

**WORKING  
TOGETHER WITH  
NGOS CAN  
GENERATE  
GREATER  
IMPACT THAN  
INDIVIDUAL  
INTERVENTIONS.**

NITIN BATHLA

It is interesting that in Delhi's case, the local partner was a well-established NGO and the intervention took place inside a single community through their mediation. As such, CURE has since been able to adapt the learnings from the design process to the interventions it carries out in other parts of the city. CURE is currently working within five communities in Delhi alone, which allows the process and the tools developed to reach a larger demographic than would have originally been intended.
